1 SUPPLEMENTARY TABLES AND FIGURES

Table A1. Parameter of the physiological baseline model estimated from the control data. Best fit was the value associated with the smallest error in the calibration and used for simulation. Median refers to the median of the posterior distribution, P_{05} and P_{95} refer to the 5th to 95th percentiles (credible intervals). For further details, see ?.

Parameter	Best fit	Median	P_{05}	P_{95}
$\sigma_{Z,M}$	0.153	0.252	0.16	0.304
$\{I\}_{max}$	1.79	1.61	1.38	1.86
k_M^{emb}	0.213	0.175	0.135	0.242
η_{AS}	0.78	0.878	0.62	0.979
H^j	9.11	12.3	7.01	18.9
γ	0.829	0.718	0.564	0.828
k_J	0.0088	0.0117	0.00104	0.0408
κ	0.81	0.739	0.67	0.857
Larval water content	0.935	0.94	0.934	0.946
Juvenile water content	0.892	0.864	0.792	0.906
Time since birth	23.5	20.6	16.7	24.3
